DETAILED ACTION

1. A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on 02/24/2011 has been entered.
2. Claims 1-41 are pending and presented for examination.

Allowable Subject Matter

3. Claims 1-41 are allowed.
- 3.0 The following is an examiner's statement of reasons for allowance:
 - 3.1 While Lee teaches a method and apparatus for use in timing analysis, including determining a plurality of arrival times, selecting timing events propagated to the input of the gate, and storing information related to a worst case timing event; and Yalcin et al. teaches a method for performing static timing analysis, including generating a TLF model based upon input slew and capacitive loading conditions, neither of these references taken either alone or in combination with the prior art of record discloses a method for determining a worst case transition that includes the selection, by using a processor, a first input timing event corresponding to a first output timing event as a worst case timing event if the first output timing event has a later arrival time of transitions at the output of the gate than the second output timing event and selecting a second input timing event corresponding to a second output timing event as the worst case timing event if the second timing event has the later arrival time of the transitions at the output of the gate than the first output timing event such that one of a plurality of timing

events propagated to the input of the gate with a worst output slew or output delay as a function of input slew at the output of the gate is selected as the worst case timing event, as specifically shown in the independent claims, in combination with the remaining elements and features of the instant invention, it is for these reasons that the applicant's invention defines over the prior art of record.

4. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Conclusion
